

JOB REF: Application for Engineering Position

Dear Mr/Mrs/Madam,

I am writing to apply for an engineering position within your organization. I am a Bachelor of Electronic Engineering (Honours) graduate from Universiti Tun Hussein Onn Malaysia (UTHM), with hands-on experience in semiconductor manufacturing, equipment support, and electronic systems gained through internships and technical training programs. I am eager to contribute my technical knowledge, practical skills, and strong work ethic to a professional engineering environment.

During my degree internship at Robert Bosch Semiconductor Manufacturing Penang, I was involved in spare part inventory management, machine buy-off support, and workpiece carrier testing and repair. I also performed PCB soldering and component replacement in compliance with ESD and IPC standards. In addition, I developed an Excel-based spare parts tracking system that improved data accuracy and operational efficiency, strengthening my understanding of manufacturing processes, equipment reliability, and quality control.

Previously, during my diploma internship at SSIS E Solution Sdn. Bhd., I gained hands-on experience in fiber optic and LAN network installation, Ethernet cable termination, system troubleshooting, and technical documentation. This experience enhanced my problem-solving skills, attention to detail, and ability to work effectively in team-based engineering projects.

I have also completed an IC Design Training Program in Design Verification at Penang Skill Development Centre (PSDC), where I gained hands-on experience with SystemVerilog and Verilog testbenches, basic UVM concepts, SystemVerilog Assertions (SVA), and a fundamental understanding of CMOS technology. This training broadened my technical foundation and strengthened my analytical thinking.

Thank you for your time and consideration. I would welcome the opportunity to further discuss my suitability for this position. I can be contacted at +6019-415 7795 or via email at haziqhasbi559@gmail.com.
